Access Control *Alone* Does Not Provide Complete Site Accountability.
EPIC Track Does.

Together, Benefit from Having Secure Access <u>and</u> Complete Data Capture at Every Door.
EPIC Track accountability solution enhances any access control system used to manage interior and exterior door locks throughout facilities. EPIC Track captures user data with every ID card scan, manages activity in real time, and generates reports to analyze data of all activity in and out of all locked doors.

EPIC Track provides a complete picture of all comings & goings throughout campus, buildings, gates, parking lots, etc. that access control systems cannot do alone.

SYSTEM INTEGRATION

EPIC Track can integrate seamlessly with your RFID technology cards.

Each ID card scan in/out at any door can also capture a record of activity.

Cloud hosted & scalable.

EVENT TRACKING

Create events tied to locations on-site & track who attended.

Track events such as meetings, trainings, mustering, member access, classroom attendance, etc.

Monitor event data in real-time.

DATA MANAGEMENT

Connect to virtually any database or software to import personnel name & unique RFID.

Export transactional data captured at specific doors for analysis.
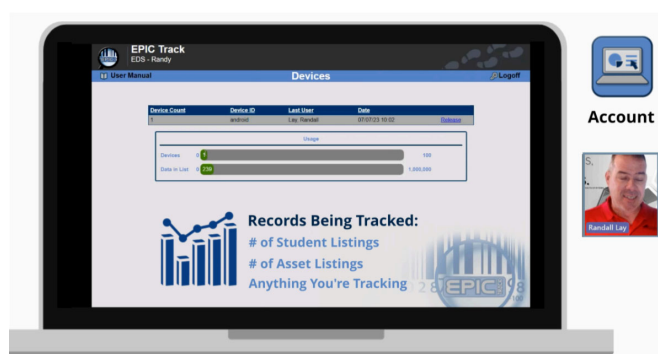

Structure events using custom data fields.

REPORTING

Run history reports on all activity data captured.

View attendance & check in/out time stamps.

Generate dynamic reports at any time.

Watch a demo to learn how applying EPIC Track to
your pre-existing access control system will provide a real-time,
complete picture of all activity coming in/out of each door.
